-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 4-22 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim *cannot depend from any other multiple dependent claim*. See MPEP § 608.01(n). Accordingly, the claims 4-22 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent Publication No. 20030161722A1.

In figures 1-4a, '722 teaches an electric fan comprising a housing body 12, a front cover 15 defining a fluid inlet 1 to the housing and a rear fluid outlet 5 aligned with said fluid inlet, a motor 7 and impeller 2 mounted within the housing between said inlet and outlet for drawing fluid into the housing in a direction from said inlet towards said outlet within the housing in an outwardly radially direction before exiting via the outlet, the front cover being moveable relative to the housing to allow access to the impeller

and motor (See page 5, lines 26-29), wherein the front cover is removable from the housing body.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent Publication No. 20030161722A1 in view of US Patent Publication NO. 20030206801A1.

'722 teaches all the claimed subject matter except that he doesn't teach the removal of the front cover effects isolation of the motor to prevent the fan working in an unguarded state.

'801, in figures 1-5, teaches a fan having a front cover 5 and a motor 3, the removal of the front cover effects isolation of the motor to prevent the fan working in an unguarded state.

Since '722 and '801 are analogous art, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the fan of

'722 so the removal of the front cover effects isolation of the motor to prevent the fan working in an unguarded state as taught by '801 for the purpose of preventing injuries.

Prior Art

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consist of one patent.

Chang (6,183,200) is cited to show a fan having a front cover and a motor but fails to teach the removal of the front cover effects isolation of the motor to prevent the fan working in an unguarded state.
